Hai Sir,

       I am V. Shyam sundar, native of Visakhapatnam. I have pursued Btech in the branch of Mechanical Engineering with 8.36CGPA. Worked as Ward Aminities secretary in Andhra pradesh State Government for a period of 10 months. I have done Internship in Hindusthan Shipyard Limited for period of 7 months.

       Coming to my family background,my father is a daily wage worker who struggled a lot for the completion of my education, and my mother is a home maker. I have no siblings.

       I believed a lot in the field of Data Science that is the reason I have resigned my Government job to get into this field. As we know Data Science will be the booming career now and in the coming days as well. So I personally feel this is the perfect time for me to get into this field. First and fore most thing which got me in to this field was my interest towards trending technologies i.e is Data Science. As Data Science requires the usage of both unstructured and structured data and It is a multidisciplinary field that has its roots in statistics, math and computer science. It is one of the most highly sought after jobs due to the abundance of data science position and a lucrative pay-scale.

       I believe I will be having a high career growth,learn the most popular data science tools.As it is a multidisciplinary field which boosted my confidence to get into it. As I started taking classes in Edyoda,they explained from the scratch even though from the mechanical background I understood all those really well. I believe Edyoda will help me in achieving the job in the field of Data Science.

Thanking you,
V. Shyam Sundar.
